Anti-Human LIPI Polyclonal Antibody

多克隆抗体

产品货号: PA04773

第三版

**描述:**The protein encoded by this gene is a phospholipase that hydrolyzes phosphatidic acid to produce lysophosphatidic acid. Defects in this gene are a cause of susceptibility to familial hypertriglyceridemia. This gene is also expressed at high levels in Ewing family tumor cells. Alternative splicing results in multiple transcript variants.LIPI (Lipase I) is a Protein Coding gene. Diseases associated with LIPI include Hypertriglyceridemia and Listeriosis. Among its related pathways are Lipoprotein metabolism and Metabolism. GO annotations related to this gene include heparin binding and phospholipase activity. An important paralog of this gene is LIPH.

**抗原:**Synthesized peptide derived from the Internal region of human LPD lipase

**配方:**

**如何使用:**加1ml超纯水重溶

**稳定性:** -20 ° C保存条件下，冻干粉,保质期为五年；液体，保质期为两年。

**稀释液:**PBS (pH7.4) ， 1% BSA

**应用:**WB 1 ~ 5  $\mu$ g/ml.

**特异性:**Expressed in testis. Expressed exclusively at the connecting piece of the sperm.
