Anti-Human MTNR1B Polyclonal Antibody

多克隆抗体

产品货号: PA04929

第三版

描述:This gene encodes one of two high affinity forms of a receptor for melatonin, the primary hormone secreted by the pineal gland. This gene product is an integral membrane protein that is a G-protein coupled, 7-transmembrane receptor. It is found primarily in the retina and brain although this detection requires RT-PCR. It is thought to participate in light-dependent functions in the retina and may be involved in the neurobiological effects of melatonin.

抗原:Synthesized peptide derived from the C-terminal region of human MEL-1B-R

配方:
