Anti-Human/Mouse/Rat MEOX2 Polyclonal Antibody

多克隆抗体

产品货号: PA05045

第三版

描述: This gene encodes a member of a subfamily of non-clustered, diverged, antennapedia-like homeobox-containing genes. The encoded protein may play a role in the regulation of vertebrate limb myogenesis. Mutations in the related mouse protein may be associated with craniofacial and/or skeletal abnormalities, in addition to neurovascular dysfunction observed in Alzheimer's disease. MEOX2 (Mesenchyme Homeobox 2) is a Protein Coding gene. Diseases associated with MEOX2 include Female Stress Incontinence and Low Compliance Bladder. GO annotations related to this gene include transcription factor activity, sequence-specific DNA binding and RNA polymerase II core promoter proximal region sequence-specific DNA binding. An important paralog of this gene is MEOX1.
