Anti-Human/Mouse/Rat MYF6 Polyclonal Antibody

多克隆抗体

产品货号: PA05189

第三版

描述:The protein encoded by this gene is a probable basic helix-loop-helix (bHLH) DNA binding protein involved in muscle differentiation. The encoded protein likely acts as a heterodimer with another bHLH protein. Defects in this gene are a cause of autosomal dominant centronuclear myopathy (ADCNM).MYF6 (Myogenic Factor 6) is a Protein Coding gene. Diseases associated with MYF6 include Myopathy, Centronuclear, 3 and Central Nervous System Mesenchymal Non-Meningothelial Tumor. Among its related pathways are C-MYB transcription factor network and CDO in myogenesis. GO annotations related to this gene include transcription factor activity, sequence-specific DNA binding and RNA polymerase II core promoter proximal region sequence-specific DNA binding. An important paralog of this gene is MYOG.

抗原:Synthesized peptide derived from the Internal region of human Myf-6

配方:

如何使用:加1ml超纯水重溶

稳定性: -20°C保存条件下,冻干粉,保质期为五年;液体,保质期为两年。

稀释液:PBS (pH7.4) , 1% BSA

应用:WB1~5 µ g/ml.

特异性:Skeletal muscle.
