Anti-Human PLA1A Polyclonal Antibody

多克隆抗体

产品货号: PA05600

第三版

描述:The protein encoded by this gene is a phospholipase that hydrolyzes fatty acids at the sn-1 position of phosphatidylserine and 1-acyl-2-lysophosphatidylserine. This secreted protein hydrolyzes phosphatidylserine in liposomes. Three transcript variants encoding different isoforms have been found for this gene. PLA1A (Phospholipase A1 Member A) is a Protein Coding gene. Among its related pathways are Acyl chain remodelling of PE and Glycerophospholipid biosynthesis. GO annotations related to this gene include hydrolase activity and phosphatidylcholine 1-acylhydrolase activity. An important paralog of this gene is LIPI.

抗原:Synthesized peptide derived from the C-terminal region of human PLA1A

配方:

如何使用:加1ml超纯水重溶

稳定性: -20 ° C保存条件下，冻干粉,保质期为五年；液体，保质期为两年。

稀释液:PBS (pH7.4) ， 1% BSA

应用:WB 1 ~ 5 μ g/ml.

特异性:Widely expressed. Expressed in placenta, prostate and liver. Weakly or not expressed in skin, leukocytes, platelets, colon, spleen, lung, muscle and kidney.
