Anti-Human RABL2A Polyclonal Antibody

多克隆抗体

产品货号: PA05675

第三版

**描述:** This gene is a member of the RAB gene family which belongs to the RAS GTPase superfamily. The proteins in the family of RAS-related signaling molecules are small GTP-binding proteins that play important roles in the regulation of exocytotic and endocytotic pathways. This gene maps to the site of an ancestral telomere fusion event and may be a subtelomeric gene. Alternative splicing results in multiple transcript variants encoding different isoforms. RABL2A (RAB, Member Of RAS Oncogene Family Like 2A) is a Protein Coding gene. GO annotations related to this gene include GTP binding and GTPase activity. An important paralog of this gene is RABL2B.

**抗原:** Synthesized peptide derived from the C-terminal region of human Rab L2A

**配方:**

**如何使用:** 加1ml超纯水重溶

**稳定性:** -20 ° C保存条件下，冻干粉,保质期为五年；液体，保质期为两年。

**稀释液:** PBS (pH7.4) ， 1% BSA

**应用:** WB 1 ~ 5  $\mu$ g/ml.

**特异性:**
