Anti-Human/Mouse RBAK Polyclonal Antibody

多克隆抗体

产品货号: PA05721

第三版

描述: This gene encodes a nuclear protein which interacts with the tumor suppressor retinoblastoma 1. The two interacting proteins are thought to act as a transcriptional repressor for promoters which are activated by the E2F1 transcription factor. This protein contains a Kruppel-associated box (KRAB), which is a transcriptional repressor motif. Read-through transcripts that include exons from the downstream gene LOC389458 are expressed from this locus. RBAK (RB Associated KRAB Zinc Finger) is a Protein Coding gene. Diseases associated with RBAK include Familial Hyperaldosteronism. GO annotations related to this gene include nucleic acid binding. An important paralog of this gene is ZNF12.

抗原: Synthesized peptide derived from the N-terminal region of human RBAK

配方:

如何使用: 加1ml超纯水重溶

稳定性: -20 ° C保存条件下，冻干粉,保质期为五年；液体，保质期为两年。

稀释液: PBS (pH7.4) ， 1% BSA

应用: WB 1 ~ 5 μg/ml.

特异性: Expressed in bone, brain, heart, kidney, liver, lung, pancreas and placenta.
