Anti-Human/Mouse/Rat RPL39 Polyclonal Antibody

多克隆抗体

产品货号: PA05765

第三版

描述: Ribosomes, the organelles that catalyze protein synthesis, consist of a small 40S subunit and a large 60S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. This gene encodes a ribosomal protein that is a component of the 60S subunit. The protein belongs to the S39E family of ribosomal proteins. It is located in the cytoplasm. In rat, the protein is the smallest, and one of the most basic, proteins of the ribosome. This gene is co-transcribed with the U69 small nucleolar RNA gene, which is located in its second intron. As is typical for genes encoding ribosomal proteins, there are multiple processed pseudogenes of this gene dispersed through the genome. RPL39 (Ribosomal Protein L39) is a Protein Coding gene. Diseases associated with RPL39 include Lacrimal Gland Adenocarcinoma. Among its related pathways are Viral mRNA Translation and rRNA processing in the nucleus and cytosol. GO annotations related to this gene include RNA binding and structural constituent of ribosome. An important paralog of this gene is RPL39L.

抗原: Synthesized peptide derived from the N-terminal region of human Ribosomal Protein L39

配方:

如何使用: 加1ml超纯水重溶

稳定性: -20 ° C保存条件下，冻干粉,保质期为五年；液体，保质期为两年。

稀释液: PBS (pH7.4) ， 1% BSA

应用: WB 1 ~ 5 μg/ml.

特异性:
