Anti-Human/Mouse RIT1 Polyclonal Antibody

多克隆抗体

产品货号: PA05781

第三版

描述: This gene encodes a member of a subfamily of Ras-related GTPases. The encoded protein is involved in regulating p38 MAPK-dependent signaling cascades related to cellular stress. This protein also cooperates with nerve growth factor to promote neuronal development and regeneration. Alternate splicing results in multiple transcript variants. RIT1 (Ras Like Without CAAX 1) is a Protein Coding gene. Diseases associated with RIT1 include Noonan Syndrome 8 and Noonan Syndrome 1. Among its related pathways are Trk receptor signaling mediated by the MAPK pathway and RET signaling. GO annotations related to this gene include GTP binding and calmodulin binding. An important paralog of this gene is RIT2.

抗原: Synthesized peptide derived from the C-terminal region of human Rit1

配方:

如何使用: 加1ml超纯水重溶

稳定性: -20 ° C保存条件下，冻干粉,保质期为五年；液体，保质期为两年。

稀释液: PBS (pH7.4) ， 1% BSA

应用: WB 1 ~ 5 μ g/ml.

特异性: Expressed in many tissues.
