Anti-Human/Mouse/Rat SF3B4 Polyclonal Antibody

多克隆抗体

产品货号: PA05806

第三版

描述: This gene encodes one of four subunits of the splicing factor 3B. The protein encoded by this gene cross-links to a region in the pre-mRNA immediately upstream of the branchpoint sequence in pre-mRNA in the prespliceosomal complex A. It also may be involved in the assembly of the B, C and E spliceosomal complexes. In addition to RNA-binding activity, this protein interacts directly and highly specifically with subunit 2 of the splicing factor 3B. This protein contains two N-terminal RNA-recognition motifs (RRMs), consistent with the observation that it binds directly to pre-mRNA. SF3B4 (Splicing Factor 3b Subunit 4) is a Protein Coding gene. Diseases associated with SF3B4 include Acrofacial Dysostosis 1, Nager Type and Acrofacial Dysostosis Syndrome Of Rodriguez. Among its related pathways are mRNA Splicing - Major Pathway and Gene Expression. GO annotations related to this gene include nucleic acid binding and nucleotide binding.

抗原: Synthesized peptide derived from the Internal region of human SAP 49

配方:

如何使用: 加1ml超纯水重溶

稳定性: -20 ° C保存条件下，冻干粉,保质期为五年；液体，保质期为两年。

稀释液: PBS (pH7.4) ， 1% BSA

应用: WB 1 ~ 5 μ g/ml.

特异性:
