Anti-Human/Mouse/Rat TANK Polyclonal Antibody

多克隆抗体

产品货号: PA05972

第三版

**描述:**The TRAF (tumor necrosis factor receptor-associated factor) family of proteins associate with and transduce signals from members of the tumor necrosis factor receptor superfamily. The protein encoded by this gene is found in the cytoplasm and can bind to TRAF1, TRAF2, or TRAF3, thereby inhibiting TRAF function by sequestering the TRAFs in a latent state in the cytoplasm. For example, the protein encoded by this gene can block TRAF2 binding to LMP1, the Epstein-Barr virus transforming protein, and inhibit LMP1-mediated NF-kappa-B activation. Three alternatively spliced transcript variants encoding different isoforms have been found for this gene. TANK (TRAF Family Member Associated NFKB Activator) is a Protein Coding gene. Among its related pathways are TRAF Pathway and 4-1BB Pathway. GO annotations related to this gene include ubiquitin protein ligase binding.

**抗原:**Synthesized peptide derived from the Internal region of human TANK

**配方:**

**如何使用:**加1ml超纯水重溶

**稳定性:** -20 ° C保存条件下，冻干粉,保质期为五年；液体，保质期为两年。

**稀释液:**PBS (pH7.4) ， 1% BSA

**应用:**WB 1 ~ 5  $\mu$ g/ml.

**特异性:**Ubiquitous.
