Anti-Human/Mouse NUP88 Polyclonal Antibody

多克隆抗体

产品货号: PA06235

第三版

**描述:**The nuclear pore complex is a massive structure that extends across the nuclear envelope, forming a gateway that regulates the flow of macromolecules between the nucleus and the cytoplasm. Nucleoporins, a family of 50 to 100 proteins, are the main components of the nuclear pore complex in eukaryotic cells. The protein encoded by this gene belongs to the nucleoporin family and is associated with the oncogenic nucleoporin CAN/Nup214 in a dynamic subcomplex. This protein is also overexpressed in a large number of malignant neoplasms and precancerous dysplasias. Alternative splicing results in multiple transcript variants encoding different isoforms. NUP88 (Nucleoporin 88) is a Protein Coding gene. Among its related pathways are HIV Life Cycle and Transport of the SLBP independent Mature mRNA. GO annotations related to this gene include transporter activity.

**抗原:**Synthesized peptide derived from the Internal region of human Nup88

**配方:**

**如何使用:**加1ml超纯水重溶

**稳定性:** -20 ° C保存条件下，冻干粉,保质期为五年；液体，保质期为两年。

**稀释液:**PBS (pH7.4) ， 1% BSA

**应用:**WB 1 ~ 5  $\mu$ g/ml.

**特异性:**Ubiquitous.
