Anti-Human/Mouse/Rat ALDOC Polyclonal Antibody

多克隆抗体

产品货号: PA06333

第三版

描述:ALDOC encodes a member of the class I fructose-biphosphate aldolase gene family. Expressed specifically in the hippocampus and Purkinje cells of the brain, the encoded protein is a glycolytic enzyme that catalyzes the reversible aldol cleavage of fructose-1,6-biphosphate and fructose 1-phosphate to dihydroxyacetone phosphate and either glyceraldehyde-3-phosphate or glyceraldehyde, respectively. ALDOC (Aldolase, Fructose-Bisphosphate C) is a Protein Coding gene. Among its related pathways are Citrate cycle (TCA cycle) and Fructose metabolism. GO annotations related to this gene include cytoskeletal protein binding and fructose-bisphosphate aldolase activity. An important paralog of this gene is ALDOA.

抗原:Synthesized peptide derived from the N-terminal region of human Aldolase C.

配方:

如何使用:加1ml超纯水重溶

稳定性: -20 ° C保存条件下，冻干粉,保质期为五年；液体，保质期为两年。

稀释液:PBS (pH7.4) ， 1% BSA

应用:WB 1 ~ 5 μ g/ml.

特异性:
