Anti-Human/Mouse/Rat SFTPA2 Polyclonal Antibody

多克隆抗体

产品货号: PA06340

第三版

描述: This gene is one of several genes encoding pulmonary-surfactant associated proteins (SFTPA) located on chromosome 10. Mutations in this gene and a highly similar gene located nearby, which affect the highly conserved carbohydrate recognition domain, are associated with idiopathic pulmonary fibrosis. The current version of the assembly displays only a single centromeric SFTPA gene pair rather than the two gene pairs shown in the previous assembly which were thought to have resulted from a duplication. SFTPA2 (Surfactant Protein A2) is a Protein Coding gene. Diseases associated with SFTPA2 include Pulmonary Fibrosis, Idiopathic and Pulmonary Fibrosis. Among its related pathways are Defective CSF2RA causes pulmonary surfactant metabolism dysfunction 4 (SMDP4) and Diseases of metabolism. GO annotations related to this gene include carbohydrate binding. An important paralog of this gene is SFTPA1.

抗原: Synthesized peptide derived from the Internal region of human SP-A.

配方:

如何使用: 加1ml超纯水重溶

稳定性: -20 ° C保存条件下，冻干粉,保质期为五年；液体，保质期为两年。

稀释液: PBS (pH7.4) ， 1% BSA

应用: WB 1 ~ 5 μg/ml.

特异性:
