Anti-Human/Mouse/Rat CALB1 Polyclonal Antibody

多克隆抗体

产品货号: PA06357

第三版

描述: Calbindin is a calcium-binding protein belonging to the troponin C superfamily. It was originally described as a 27-kD protein induced by vitamin D in the duodenum of the chick. In the brain, its synthesis is independent of vitamin-D-derived hormones. Calbindin contains 4 active calcium-binding domains, and 2 modified domains that presumably have lost their calcium-binding capacity. The neurons in brains of patients with Huntington disease are calbindin-depleted.

抗原: Synthesized peptide derived from the C-terminal region of human Calbindin D28K.

配方:

如何使用: 加1ml超纯水重溶
