Anti-Human/Mouse/Rat CTSH Polyclonal Antibody

多克隆抗体

产品货号: PA06759

第三版

描述:The protein encoded by this gene is a lysosomal cysteine proteinase important in the overall degradation of lysosomal proteins. It is composed of a dimer of disulfide-linked heavy and light chains, both produced from a single protein precursor. The encoded protein, which belongs to the peptidase C1 protein family, can act both as an aminopeptidase and as an endopeptidase. Increased expression of this gene has been correlated with malignant progression of prostate tumors.

抗原:Recombinant protein of human CTSH
