Anti-Human/Rat VGF Polyclonal Antibody

多克隆抗体

产品货号: PA07163

第三版

描述: This gene is specifically expressed in a subpopulation of neuroendocrine cells, and is upregulated by nerve growth factor. The structural organization of this gene is similar to that of the rat gene, and both the translated and the untranslated regions show a high degree of sequence similarity to the rat gene. The encoded secretory protein also shares similarities with the secretogranin/chromogranin family, however, its exact function is not known.

抗原: Synthetic peptide of human VGF

配方:
