TZYBIOTECH

Anti-Human/Mouse/Rat PLXNA3 Polyclonal Antibody

: PA07289

:This gene encodes a member of the plexin class of proteins. The encoded protein is a class 3 semaphorin receptor, and may be involved in cytoskeletal remodeling and as well as apoptosis. Studies of a similar gene in zebrafish suggest that it is important for axon pathfinding in the developing nervous system. This gene may be associated with tumor progression.

:Synthetic peptide of human PLXNA3

:

: 1ml

: -20° C   ,

:PBS (pH 7.4)   1% BSA

:WB 1   5μg/ml.

:
