Anti-Human TNFAIP2 Polyclonal Antibody

多克隆抗体

产品货号: PA07566

第三版

描述: This gene was identified as a gene whose expression can be induced by the tumor necrosis factor alpha (TNF) in umbilical vein endothelial cells. The expression of this gene was shown to be induced by retinoic acid in a cell line expressing a oncogenic version of the retinoic acid receptor alpha fusion protein, which suggested that this gene may be a retinoic acid target gene in acute promyelocytic leukemia.

抗原: Fusion protein of human TNFAIP2
