Anti-Human SSTR3 Polyclonal Antibody

多克隆抗体

产品货号: PA08931

第三版

描述: Somatostatin acts at many sites to inhibit the release of many hormones and other secretory proteins. The biological effects of somatostatin are probably mediated by a family of G protein-coupled receptors that are expressed in a tissue-specific manner. SSTR3 is a member of the superfamily of receptors having seven transmembrane segments and is expressed in highest levels in brain and pancreatic islets. SSTR3 is functionally coupled to adenylyl cyclase.

抗原: Synthetic peptide of human SSTR3
