Anti-Human CALCA Polyclonal Antibody

多克隆抗体

产品货号: PA09831

第三版

**描述:** This gene encodes the peptide hormones calcitonin, calcitonin gene-related peptide and katecalcitonin by tissue-specific alternative RNA splicing of the gene transcripts and cleavage of inactive precursor proteins. Calcitonin is involved in calcium regulation and acts to regulate phosphorus metabolism. Calcitonin gene-related peptide functions as a vasodilator while katecalcitonin is a calcium-lowering peptide. Multiple transcript variants encoding different isoforms have been found for this gene.
