Anti-Human/Mouse/Rat KCNJ9 Polyclonal Antibody

多克隆抗体

产品货号: PA09988

第三版

**描述:** Potassium channels are present in most mammalian cells, where they participate in a wide range of physiologic responses. The protein encoded by this gene is an integral membrane protein and inward-rectifier type potassium channel. The encoded protein, which has a greater tendency to allow potassium to flow into a cell rather than out of a cell, is controlled by G-proteins. It associates with another G-protein-activated potassium channel to form a heteromultimeric pore-forming complex.

**抗原:** Synthetic peptide of human KCNJ9

**配方:**

**如何使用:** 加1ml超纯水重溶
