Anti-Human/Mouse/Rat RRAGA Polyclonal Antibody

多克隆抗体

产品货号: PA11750

第三版

描述: Ras-related GTP-binding protein A is a protein that in humans is encoded by the RRAGA gene. Guanine nucleotide-binding protein forming heterodimeric Rag complexes required for the amino acid-induced relocalization of mTORC1 to the lysosomes and its subsequent activation by the GTPase RHEB. This is a crucial step in the activation of the TOR signaling cascade by amino acids. Involved in the RCC1/Ran-GTPase pathway. May play a direct role in a TNF-alpha signaling pathway leading to induction of cell death.
