Anti-Human/Mouse NDUFS8 Polyclonal Antibody

多克隆抗体

产品货号: PA11864

第三版

描述: This gene encodes a subunit of mitochondrial NADH:ubiquinone oxidoreductase, or Complex I, a multimeric enzyme of the respiratory chain responsible for NADH oxidation, ubiquinone reduction, and the ejection of protons from mitochondria. The encoded protein is involved in the binding of two of the six to eight iron-sulfur clusters of Complex I and, as such, is required in the electron transfer process. Mutations in this gene have been associated with Leigh syndrome.

抗原: Recombinant protein of human NDUFS8

配方:
