Anti-Human/Mouse MMP28 Polyclonal Antibody

多克隆抗体

产品货号: PA12459

第三版

描述:Proteins of the matrix metalloproteinase (MMP) family are involved in the breakdown of extracellular matrix for both normal physiological processes, such as embryonic development, reproduction and tissue remodeling, and disease processes, such as asthma and metastasis. This gene encodes a secreted enzyme that degrades casein. Its expression pattern suggests that it plays a role in tissue homeostasis and in wound repair. Transcript variants encoding different isoforms have been described.

抗原:Recombinant protein of human MMP28
