MED27, 1-311aa, Human, His tag, E.coli

产品货号: TP02941

第三版

别名:Mediator complex subunit 27, CRAP34, CRSP34, CRSP8, TRAP37

描述: MED27 is a subunit of the CRSP (cofactor required for SP1 activation) complex, which, along with TFIID, is required for efficient activation by SP1. This protein is also a component of other multisubunit complexes e.g. thyroid hormone receptor-(TR)-associated proteins which interact with TR and facilitate TR function on DNA templates in conjunction with initiation factors and cofactors. Recombinant human MED27 protein, fused to His-tag at N-terminus, was expressed in E.coli.
