第三版

别名:Cytosolic Fe-S cluster assembly factor NuBP1 isoform 1, NBP, NBP1, NBP35

描述:NuBP1 also known as cytosolic Fe-S cluster assembly factor NuBP1 isoform 1. NuBP1 is implicated in the regulation of centrosome duplication by similarity. This protein is component of the cytosolic iron-sulfur (Fe/S) protein assembly (CIA) machinery. It required for maturation of extra mitochondrial Fe-S proteins The NuBP1-NuBP2 heterotetramer forms a Fe-S scaffold complex, mediating the de novo assembly of a Fe-S cluster and its transfer to target apoproteins. Recombinant human NuBP1 protein, fused to His-tag at N-terminus, was expressed in E.coli and purified by using conventional chromatography techniques.

配方:Liquid, In Phosphate buffered saline (pH7.4) containing 10% glycerol, 1mM DTT
