NUDT16, 1-195aa, Human, His tag, E.coli

产品货号: TP03225

第三版

别名:Nudix type motif 16

描述:NUDT16 is nuclear nucleoside diphosphatase proteins localized within foci in the nucleolus and nucleoplasm. This is a RNA-decapping enzyme that binds specifically to U8 snoRNA. It can remove m7G and m227G caps from RNAs, rendering them substrates for 5' -3' exonucleases for degradation in vivo. Recombinant human NUDT16 protein, fused to His-tag at N-terminus, was expressed in E.coli and purified by using conventional chromatography techniques.
