RAD51D iso4,1-216aa, Human, His tag, E.coli

产品货号: TP03660

第三版

别名:RAD51 homolog D isoform 4, BROVCA4, R51H3, RAD51L3, TRAD

**描述:**RAD51D is a member of the RAD51 protein family. RAD51 family members are highly similar to bacterial RecA and *Saccharomyces cerevisiae* Rad51, which are known to be involved in the homologous recombination and repair of DNA. This protein forms a complex with several other members of the RAD51 family, including RAD51L1, RAD51L2, and XRCC2. The protein complex formed with this protein has been shown to catalyze homologous pairing between single- and double-stranded DNA, and is thought to play a role in the early stage of recombinational repair of DNA. Recombinant human RDA51D protein, fused to His-tag at N-terminus, was expressed in E.coli.
