别名:Tumor necrosis factor receptor superfamily member 10C, CD263, DCR1, DCR1-TNFR, LIT, TRAIL-R3, TRAILR3, TRID

描述:TNFRSF10C also known as tumor necrosis factor receptor superfamily member 10C is a member of the TNF-receptor superfamily. This receptor contains an extracellular TRAIL-binding domain and a transmembrane domain, but no cytoplasmic death domain. This receptor is not capable of inducing apoptosis, and is thought to function as an antagonistic receptor that protects cells from TRAIL-induced apoptosis. Recombinant human TNFRSF10C, fused to His-tag at N-terminus, was expressed in E.coli and purified by using conventional chromatography techniques.
