Recombinant Mouse Tumor Necrosis Factor Receptor II Protein

产品货号: TP05013

第三版

别名:Tumor necrosis factor receptor superfamily member 1b;Tnfrsf1b;

描述:Tumor Necrosis Factor Receptor Superfamily Member 1B (TNFRSF1B) is a member of the Tumor Necrosis Factor Receptor Superfamily. TNFRSF1B contains four TNFR-Cys repeats. TNFRSF1B can be cleaved into the following 2 chains: Tumor necrosis factor receptor superfamily member 1b and membrane form and Tumor necrosis factor-binding protein 2. TNFRSF1B is a receptor with high affinity for TNFSF2/TNF- α and approximately 5-fold lower affinity for homotrimeric TNFSF1/lymphotoxin- α . TNFRSF1B mediates most of the metabolic effects of TNF- α . TNF- α -induced apoptosis suggests that it regulates TNF- α function by antagonizing its biological activity.
