产品货号: TP05427

第三版

别名:Kell blood group glycoprotein; CD238; KEL

描述:Kell blood group glycoprotein (KEL) is a single-pass type II membrane protein which belongs to the peptidase M13 family. It is expressed in Expressed at high levels in erythrocytes and testis, and, at lower levels, in skeletal muscle, tonsils, lymph node, spleen and appendix. It links via a single disulfide bond to the XK membrane protein that carries the Kx antigen.
