Recombinant Human High Mobility Group Protein B2/HMGB2 Protein(C-6His)

产品货号: TP05732

第三版

别名:High Mobility Group Protein B2; High Mobility Group Protein 2; HMG-2; HMGB2; HMG2

描述:High Mobility Group Protein B2 (HMGB2) belongs to the non-histone chromosomal high-mobility group protein family. Members of this family are chromatin-associated and widely spread in the nucleus of higher eukaryotic cells. HMGB2 contains 2 HMG box DNA-binding domains. It is associated with chromatin and has the ability to bend DNA, preferentially single-stranded DNA. It is shown that HMGB2 is able to efficiently bend DNA and form DNA circles. In addition, HMGB2 is involved in the final ligation step in DNA end-joining processes of DNA double-strand breaks repair and V(D)J recombination.
