Recombinant Human Cadherin-17/LI-Cadherin/CDH17 Protein(C-6His)

产品货号: TP06083

第三版

别名: Cadherin-17; Intestinal Peptide-Associated Transporter HPT-1; Liver-Intestine Cadherin; LI-Cadherin; CDH17

**描述:** Cadherin-17 is a single-pass type I membrane protein that belongs to the cadherin superfamily. Cadherin-17 consists of one extracellular region containing seven cadherin domains and one transmembrane region but it lacks the conserved cytoplasmic domain. Cadherin-17 is expressed in the gastrointestinal tract and pancreatic duct. Cadherins are calcium dependent cell adhesion proteins and preferentially interact with each other in a homophilic manner in connecting cells. Cadherin-17 may have a role in the morphological organization of liver and intestine and involved in intestinal peptide transport.
