Recombinant Human NCR3/NKp30/CD337 Protein(C-6His)

产品货号: TP06202

第三版

别名:NCR3 Protein; Natural Cytotoxicity Triggering Receptor 3; Natural Cytotoxicity Triggering Receptor 3 Isoform CRA_c;
NCR3

描述:Natural Cytotoxicity Triggering Receptor 3 (NCR3) along with NKp44 and NKp46 constitute a group of receptors termed “ Natural Cytotoxicity Receptors ” . They play a major role in triggering NK-mediated killing of most tumor cells lines. NKp30 is a type I transmembrane protein having a single extracellular V-like immunoglobulin domain. NKp30 is selectively expressed both in resting and activated human NK cells. In addition, NKp30 is also involved in NK-mediated induction of dendritic cell (DC) maturation. It has been demonstrated that NK cell activation signaling specifically induces lytic activity against several tumor cell types and synthesis of new NF- κ B dependent proteins during the initiation of cytotoxicity.
