

Fezf1 Anti-Mouse Rabbit IgG Affinity Purify

Polyclonal Antibody

Cat.NO.: PA01150

3th Edition

Description: Mouse Fezf1 (also called Fez, Zfp312-like or 3110069A13Rik) is a transcription factor, C2H2-type zinc finger protein consists of 475 amino acids, and it is expressed in the olfactory bulb (OB) and hypothalamic region in mice. Experiments of Fezf1-deficient mice indicate that Fezf1 is required for the penetration of olfactory axons through the CNS basal lamina before they innervate the OB.

Antigen: Synthetic peptide of the C terminal part of Mouse Fezf1 (CGPLPSGLHQQGHQ)

Form: Lyophilized product from 1 % BSA in PBS containing 0.05 % NaN₃

How to use: 1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution: PBS (pH7.4) containing 1% BSA

Application: This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity: Reacts with mouse Fezf1 and not react with Fezf2.
