

RON (G1385) Anti-Human Rabbit IgG Affinity Purify

Polyclonal Antibody

Cat.NO.: PA01334

3th Edition

Description: The c-MET gene encodes the tyrosine kinase p190MET, the receptor for a molecule known as Scatter Factor (SF) or Hepatocyte Growth Factor (HGF). This molecule has biological activities on epithelial sheets, including mitogenesis, cell-cell dissociation, stimulation of migration into the extracellular matrix, induction of cell polarization and branched tubulogenesis.

Antigen: Synthetic peptide for a part of C terminal of human RON

Form: Lyophilized product from 1% BSA in PBS containing 0.05%NaN₃

How to use: 1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution: PBS (pH7.4) containing 1% BSA

Application: This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity: Confirmed its specific reaction with RON/BaF3 transfectant
