

**Anti-Human/Mouse/Rat Phospho-TPH2 (Ser19) Polyclonal Antibody**

**Polyclonal Antibody**

**Cat.NO.: PA01718**

---

3th Edition

**Description:** This gene encodes a member of the pterin-dependent aromatic acid hydroxylase family. The encoded protein catalyzes the first and rate limiting step in the biosynthesis of serotonin, an important hormone and neurotransmitter. The human genome contains two related tryptophan hydroxylases, one on chromosome 11p15-p14 and one on chromosome 12q21. This gene is expressed predominantly in the brain stem.

**Antigen:** Synthesized peptide derived from human TPH2 around the phosphorylation site of S19.

**Form:**

**How to use:** 1.0 ml distilled water will be added to the product

**Stability:** Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

**Dilution:** PBS (pH7.4) containing 1% BSA

**Application:** This antibody can be used for western blotting in concentration of 1?5?g/ml.

**Specificity:** Brain specific.
