

**Anti-Human/Mouse/Rat/Monkey Phospho-FAK (Tyr407) Polyclonal Antibody**

**Polyclonal Antibody**

**Cat.NO.: PA01789**

---

3th Edition

**Description:** Non-receptor protein-tyrosine kinase implicated in signaling pathways involved in cell motility, proliferation and apoptosis. Activated by tyrosine-phosphorylation in response to either integrin clustering induced by cell adhesion or antibody cross-linking, or via G-protein coupled receptor (GPCR) occupancy by ligands such as bombesin or lysophosphatidic acid, or via LDL receptor occupancy. Microtubule-induced dephosphorylation at Tyr-397 is crucial for the induction of focal adhesion disassembly. Plays a potential role in oncogenic transformations resulting in increased kinase activity.

**Antigen:** Synthesized peptide derived from human FAK around the phosphorylation site of Tyr407

**Form:**

**How to use:** 1.0 ml distilled water will be added to the product

**Stability:** Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

**Dilution:** PBS (pH7.4) containing 1% BSA

**Application:** This antibody can be used for western blotting in concentration of 1?5?g/ml.

**Specificity:** Expressed in all organs tested, in lymphoid cell lines, but most abundantly in brain.
