

Anti-Human APOF Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA02066

3th Edition

Description:The product of this gene is one of the minor apolipoproteins found in plasma. This protein forms complexes with lipoproteins and may be involved in transport and/or esterification of cholesterol. APOF (Apolipoprotein F) is a Protein Coding gene. Among its related pathways are Lipoprotein metabolism and Metabolism. GO annotations related to this gene include receptor binding and lipid transporter activity.

Antigen:Synthesized peptide derived from the C-terminal region of human ApoF

Form:

How to use:1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution:PBS (pH7.4) containing 1% BSA

Application:This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity:Expressed by the liver and secreted in plasma.
