

Anti-Human ATXN2L Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA02164

3th Edition

Description: This gene encodes an ataxin type 2 related protein of unknown function. This protein is a member of the spinocerebellar ataxia (SCAs) family, which is associated with a complex group of neurodegenerative disorders. Several alternatively spliced transcripts encoding different isoforms have been found for this gene. ATXN2L (Ataxin 2 Like) is a Protein Coding gene. GO annotations related to this gene include poly(A) RNA binding. An important paralog of this gene is ATXN2.

Antigen:Synthesized peptide derived from the Internal region of human Ataxin-2L

Form:

How to use:1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution: PBS (pH7.4) containing 1% BSA

Application: This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity:Expressed at high levels in thymus, lymph node, spleen, fetal kidney and adult testis. Constitutively associated with MPL and EPOR in hematopoietic cells.
