

Anti-Human/Mouse/Rat ANKRD1 Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA02441

3th Edition

Description:The protein encoded by this gene is localized to the nucleus of endothelial cells and is induced by IL-1 and TNF-alpha stimulation. Studies in rat cardiomyocytes suggest that this gene functions as a transcription factor. Interactions between this protein and the sarcomeric proteins myopalladin and titin suggest that it may also be involved in the myofibrillar stretch-sensor system.

Antigen:Synthesized peptide derived from the C-terminal region of human CARP

Form:

How to use:1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution:PBS (pH7.4) containing 1% BSA

Application:This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity:Mainly expressed in activated vascular endothelial cells. To a lower extent, also expressed in hepatoma cells.
