

Anti-Human/Mouse CEP152 Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA02671

3th Edition

Description: This gene encodes a protein that is thought to be involved with centrosome function. Mutations in this gene have been associated with primary microcephaly (MCPH4). Alternative splicing results in multiple transcript variants. CEP152 (Centrosomal Protein 152) is a Protein Coding gene. Diseases associated with CEP152 include Microcephaly 9, Primary, Autosomal Recessive and Seckel Syndrome 5. Among its related pathways are Regulation of PLK1 Activity at G2/M Transition and Organelle biogenesis and maintenance. GO annotations related to this gene include protein kinase binding.

Antigen: Synthesized peptide derived from the Internal region of human CEP152

Form:

How to use: 1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution: PBS (pH7.4) containing 1% BSA

Application: This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity:
