

Anti-Human/Mouse/Monkey CBLN4 Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA02689

3th Edition

Description: This gene encodes a member of a family of small secreted proteins containing C1Q domains. Members of this family are involved in regulation of neurexin signalling during synapse development. The mouse homolog of the protein encoded by this gene competes with netrin to bind to the deleted in colorectal cancer receptor. CBLN4 (Cerebellin 4 Precursor) is a Protein Coding gene. An important paralog of this gene is CBLN2.

Antigen: Synthesized peptide derived from the C-terminal region of human Cerebellin 4

Form:

How to use: 1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution: PBS (pH7.4) containing 1% BSA

Application: This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity:
