

Anti-Human c-Rel Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA03110

3th Edition

Description:The REL gene encodes c-Rel, a transcription factor that is a member of the Rel/NF κ B family, which also includes RELA (MIM 164014), RELB (604758), NF κ B1 (MIM 164011), and NF κ B2 (MIM 164012). These proteins are related through a highly conserved N-terminal region termed the 'Rel domain,' which is responsible for DNA binding, dimerization, nuclear localization, and binding to the NF κ B inhibitor

Antigen:Synthesized peptide derived from human c-Rel around the non-phosphorylation site of Ser503.

Form:

How to use:1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution:PBS (pH7.4) containing 1% BSA

Application:This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity:
