

**Anti-Human/Mouse/Rat CSP Polyclonal Antibody**

**Polyclonal Antibody**

**Cat.NO.: PA03143**

---

3th Edition

**Description:** This gene is a member of the J protein family. J proteins function in many cellular processes by regulating the ATPase activity of 70 kDa heat shock proteins. The encoded protein plays a role in membrane trafficking and protein folding, and has been shown to have anti-neurodegenerative properties. The encoded protein is known to play a role in cystic fibrosis and Huntington's disease. A pseudogene of this gene is located on the short arm of chromosome 8.

**Antigen:** Synthesized peptide derived from the C-terminal region of human CSP

**Form:**

**How to use:** 1.0 ml distilled water will be added to the product

**Stability:** Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

**Dilution:** PBS (pH7.4) containing 1% BSA

**Application:** This antibody can be used for western blotting in concentration of 1?5?g/ml.

**Specificity:** Expressed in pancreas, kidney, skeletal muscle, liver, lung, placenta, brain and heart.
