

Anti-Human/Mouse/Rat CSP Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA03143

3th Edition

Description: This gene is a member of the J protein family. J proteins function in many cellular processes by regulating the ATPase activity of 70 kDa heat shock proteins. The encoded protein plays a role in membrane trafficking and protein folding, and has been shown to have anti-neurodegenerative properties. The encoded protein is known to play a role in cystic fibrosis and Huntington's disease. A pseudogene of this gene is located on the short arm of chromosome 8.

Antigen: Synthesized peptide derived from the C-terminal region of human CSP

Form:

How to use: 1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution: PBS (pH7.4) containing 1% BSA

Application: This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity: Expressed in pancreas, kidney, skeletal muscle, liver, lung, placenta, brain and heart.
