

Anti-Human/Mouse/Rat CSRNP2 Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA03168

3th Edition

Description:The protein encoded by this gene belongs to the CSRNP family of nuclear proteins that share conserved regions, including cysteine- and serine- rich regions, a basic domain, a transcriptional activation domain, and bind the sequence 'AGAGTG', thus have the hallmark of transcription factors. Studies in mice suggest that these genes may have redundant functions. Alternatively spliced transcript variants have been found for this gene.CSRNP2 (Cysteine And Serine Rich Nuclear Protein 2) is a Protein Coding gene. Diseases associated with CSRNP2 include Retinitis Pigmentosa 4, Autosomal Dominant Or Recessive. GO annotations related to this gene include transcription factor activity, sequence-specific DNA binding and transcriptional activator activity, RNA polymerase II transcription regulatory region sequence-specific binding. An important paralog of this gene is CSRNP3.

Antigen:Synthesized peptide derived from the Internal region of human CSRNP2

Form:

How to use:1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution:PBS (pH7.4) containing 1% BSA

Application:This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity:
