

Anti-Human/Mouse/Rat CK-10 Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA03458

3th Edition

Description: Cytokeratin 10 (CK10) has a molecular weight of 56.5KDa and is mainly marked on the basal and granular cell layers of the epithelium. Meanwhile, the expression of CK10 is proportional to the degree of cell differentiation, and the highly differentiated ones are often positive, which is mainly used in the diagnosis of squamous cell carcinoma.

Antigen: Synthesized peptide derived from the Internal region of human Cytokeratin 10

Form:

How to use: 1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution: PBS (pH7.4) containing 1% BSA

Application: This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity: Seen in all suprabasal cell layers including stratum corneum.
