

Anti-Human EGFL4 Polyclonal Antibody

Polyclonal Antibody

Cat.NO.: PA03669

3th Edition

Description:The protein encoded by this gene is a single-pass type I membrane protein of unknown function that contains several EGF-like domains, Kelch repeats, and PSI domains. Defects in this gene are a cause of Carpenter syndrome 2. Two transcript variants encoding different isoforms have been found for this gene.MEGF8 (Multiple EGF Like Domains 8) is a Protein Coding gene. Diseases associated with MEGF8 include Carpenter Syndrome 2 and Carpenter Syndrome. GO annotations related to this gene include calcium ion binding and receptor activity. An important paralog of this gene is ATRNL1.

Antigen:Synthesized peptide derived from the Internal region of human EGFL4

Form:

How to use:1.0 ml distilled water will be added to the product

Stability: Lyophilized product, 5 years at 2 – 8°C; Solution, 2 years at –20°C

Dilution:PBS (pH7.4) containing 1% BSA

Application:This antibody can be used for western blotting in concentration of 1?5?g/ml.

Specificity:
